Quick Details

Type: Parking Guidance System

Place of Origin: Fujian, China (Mainland)

Brand Name: KEYTOP

Warranty: 1 Years, 3 months to replace, 1 year to repair

Detection Tehcnology: Ultrasonic Wave

Detection Range: 0.1~3.5m

Communication Way: RS485 or TCP/IP

Communication Distance: 1000m

Working Temperature: -40~+80 centigrade degrees

Working Voltage of Sensor: DC12~24V

Parking Space Indicator: Green/Red or Blue/Red

Wiring: Network Cable

Parking Management Software: English Version or Mulitple Languages

Packaging & Delivery

Packaging Details

standard export carton

Delivery Time

within 15~30 days against payment

Product Description

Smart Parking Guidance System made in China by KEYTOP

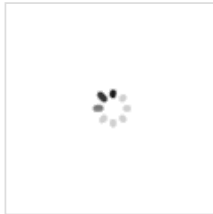

Parking guidance system is using ultrasound sensor to detect parking status and led lamp to show red for occupancy, green for vacancy and blue for handicapped slots. From the moment drivers enter the garage, the visible indoor led display indicates number and directions of available parking spaces at the crossings. This smart parking solution helps people save a lot of time and fuel in finding a free parking space. Meanwhile, it is with web-based parking management software, which can let garage operators check parking status vividly via PC. It reduces a lot of labour costs in guiding people to empty parking slots.

automated car parking system

parking system

Working Procedure

- 1.Outdoor led display shows real-time number of empty parking slots in the garage,telling drivers which level should go.
- 2.Indoor led display informs people on every point of decision,the vacancy of parking spaces by displaying 1 arrow and 3 digits.
- 3.Every parking lot is monitored by ultrasonic detector and led lamp,it is visible for people to see which parking lots are empty and can park in.
