# An easier, better way to take anyone's temperature.

Thermo is a game changer. Now a fast, effortless gesture yields a precise temperature measurement, and automatic sync with the dedicated app also allows you to track temperature readings, get reminders, and input related symptoms/medications right on your smartphone.

# Highly accurate

Thermo measures from the temporal artery, considered an ideal place to detect temperature changes, as the blood that

# No mess. No fuss.

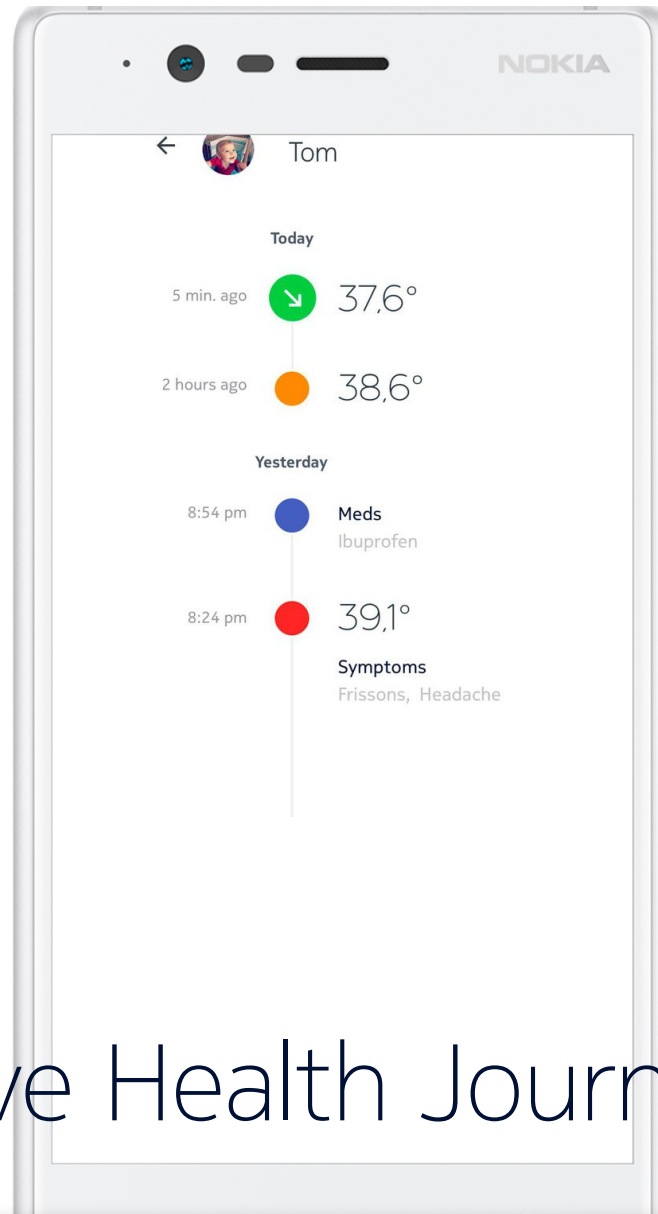

Unlike many traditional methods, Thermo avoids any discomfort and is an extremely sanitary way to take anyone's temperature.

---

# Instant feedback

Readings appear illuminated on the device along with a color-coded LED indicator to tell you if the temperature is normal, elevated or high based on the age of the user.

# Comprehensive Health Journal

and dosages.

### No discomfort

Unlike traditional methods, there is no need to undress and the baby feels nothing.

### Readable at night

Lights-off measurement allows a child to sleep while keeping tabs on a fever.

### Self-measurement

Easy to take one's temperature twice when the reading is
